

Epson WorkForce DS-30

DATASHEET

The Epson WorkForce DS-30 is a portable business scanner, designed for easy and effective document management on the move.

Because it's one of the lightest business scanners on the market at 325 grammes and because of its compact size, it's easy to take anywhere. So, wherever there is a need to scan and store paper documents such as business cards or signed forms, the DS-30 digitises them with ease. And, as it's powered by USB 2.0, no external power supply is needed, it's simple to get started. Users don't need any special training, as its interface is intuitive and quick to master, subsequently the versatile DS-30 suits everyone from the beginner to the advanced user.

The DS-30 also comes with a document management suite to deliver advanced features. The EpsonScan software offers a wide range of functionality including auto rotation, auto page size detection, text enhancement, RGB colour dropout, searchable PDF, auto area segmentation and punch hole removal. The ABBYY FineReader software offers Optical Character Recognition and Presto! BizCard 5 helps manage business cards.

Users can take advantage of the free download of Epson's Document Capture Pro from its website¹ – enabling the DS-30 to be seamlessly integrated into businesses' workflow via all common Document Management Systems. Do more than just scan with it as, in combination with Document Capture Pro, the DS-30 offers many 'scan-to' functions, including scan-to-cloud, scan-to-email and scan-to-SharePoint alongside many other document imaging features such as a barcode recognition and a zonal OCR-A / B support.

KEY FEATURES

- A4 portable document scanner
- Compact size of 276 x 50 x 36.5mm
- One of the lightest business scanners available at 325g
- USB powered
- Up to 600 dpi scan resolution
