ID-ALL, developed by CARDPRESSO

Since 2013, CARDPRESSO has been developing an innovative range of card personalization software. With nearly 350 partners in over 90 countries and 550,000 licenses sold, CARDPRESSO is the market leader.

SUMMARY

3 _ **ID-ALL**, the card personalization software, designed for ALL

4 _ Meets **all card personalization needs**

6 _ Creates all types of cards, **for all markets**

8 _ **Offers all the features** you would expect

14 _ Designed for **all users**

16 _ **Covers all needs**, with 4 editions

17 _ Take advantage of ID-ALL **with your Evolis card printer**

ID-ALL, the software for personalizing cards, designed for ALL

ID-ALL is the ideal solution for anyone who wants to personalize cards of any kind. It offers numerous graphic and electronic personalization options, making it the most comprehensive card personalization software on the market. And it can also be adapted: ID-ALL is available in 4 editions, to cover all needs, from the simplest to the most specific.

All users, all sectors, all applications...
ID-ALL is the software designed for ALL.

Meets

ALL PERSONALIZATION REQUIREMENTS

→ Graphic personalization

Graphic personalization brings together all the elements that can be printed by the card printer. It can be done on only the front of the card or on both sides to bring the design you have imagined to life.

OFFERS ALL THE FEATURES

you would expect

ID-ALL has been designed to create all kinds of cards. It offers a very wide range of features for infinite personalization possibilities. And that's not all; additional plugins are also available to enrich your experience with ID-ALL.

Design

Printing

Databases

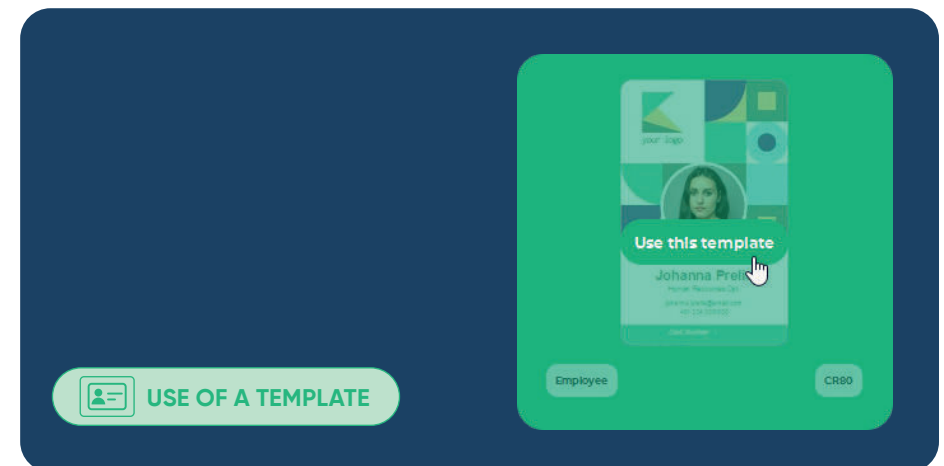

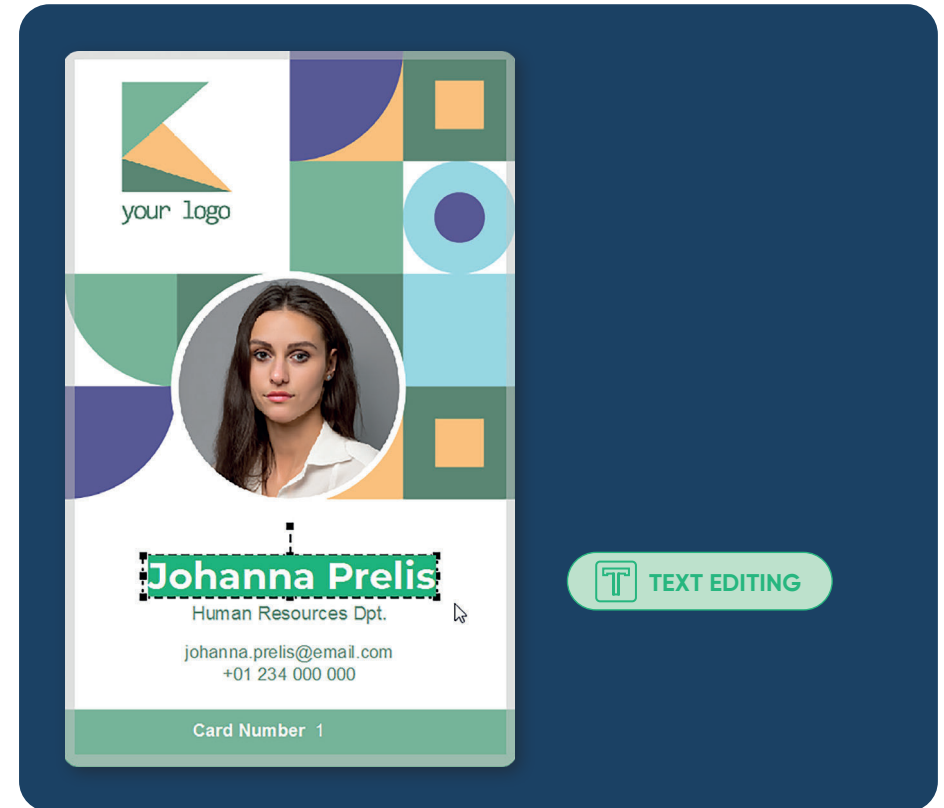

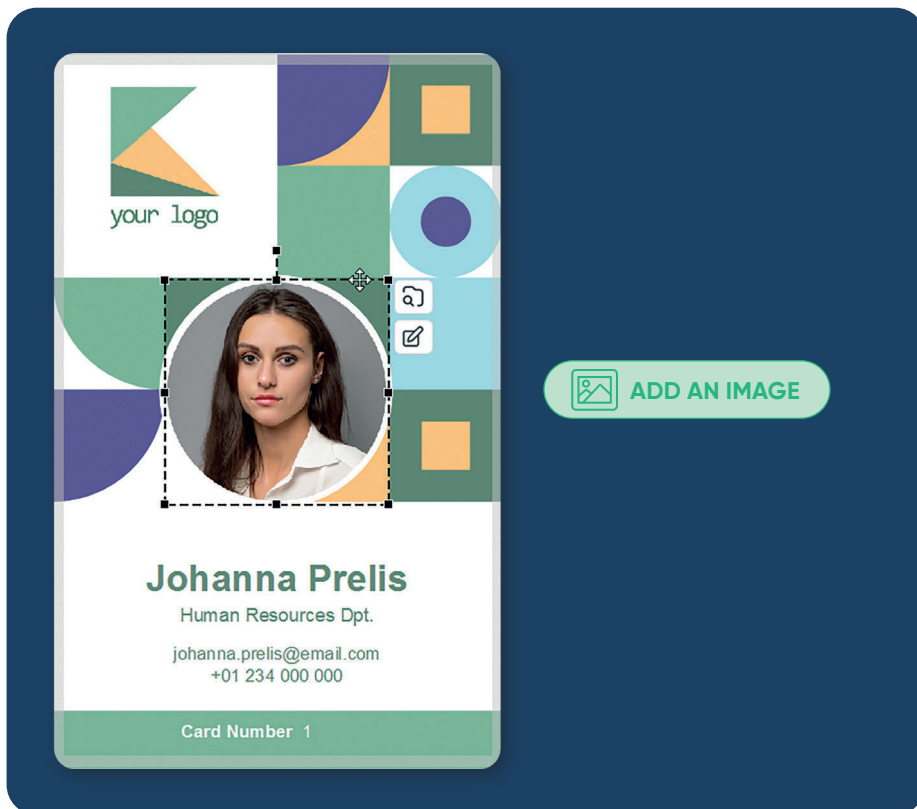

Encoding

Security

Installation & configuration

Design

- Text editing
- Advanced image and photo insertion and optimization
- Dynamic fields: date, time, counter
- Library of card templates and visuals
- Different card formats available
- Single or double-sided design
- Multiple simultaneous designs and conditional formatting
- Management of color layers, overlay, UV and custom fluorescent panel
- Creation of a digital copy of the card
- Addition of personalized functionalities via script

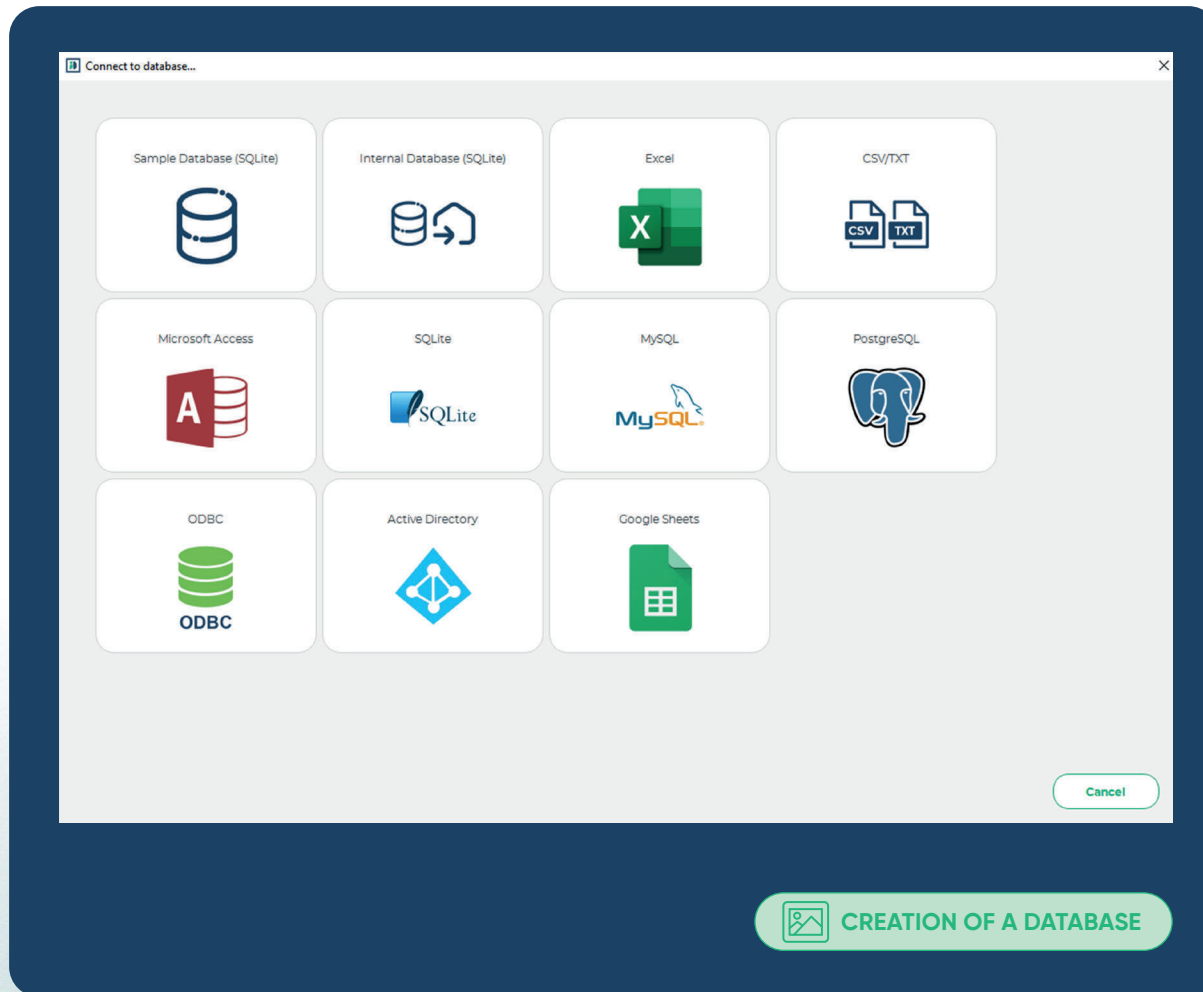

Printing

- Automatic double-sided printing
- Batch printing
- Conditional printing

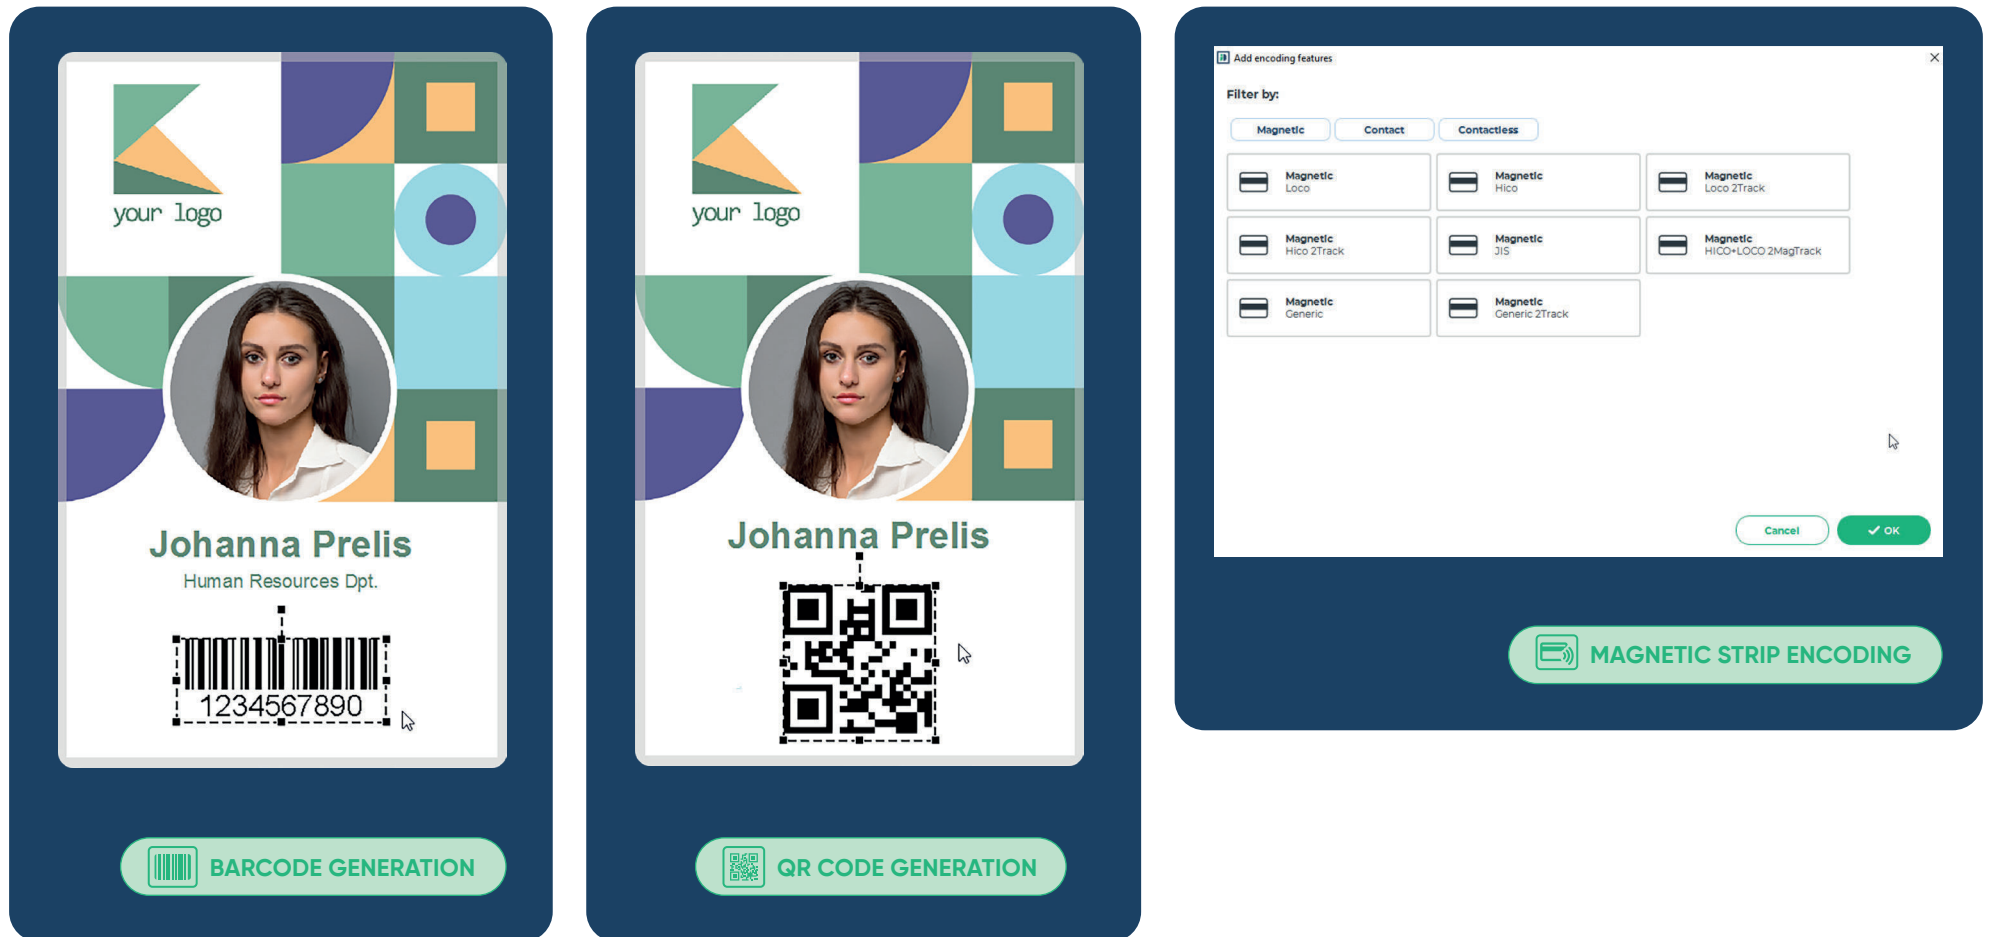

Databases

- Creation and management of internal databases
- Connection to your external databases: MS Excel, CSV, TXT, MS Access, SQLite, Google Sheets, MySQL, PostgreSQL, Active Directory, ODBC (MS SQL Server, Oracle, etc.)

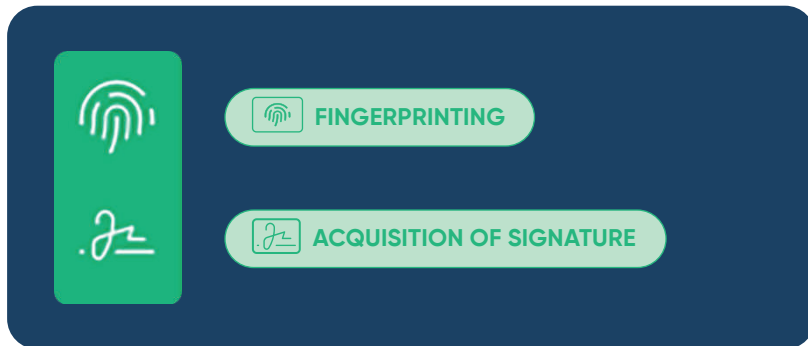

Encoding

- Generation of 1D and 2D barcodes and QR codes
- Magnetic stripe encoding
- Contact and contactless smart card encoding
- Compatible internal or external RFID encoder
- MIFARE® Classic® and Ultralight® (including NFC) compatible
- MIFARE® DESFire®

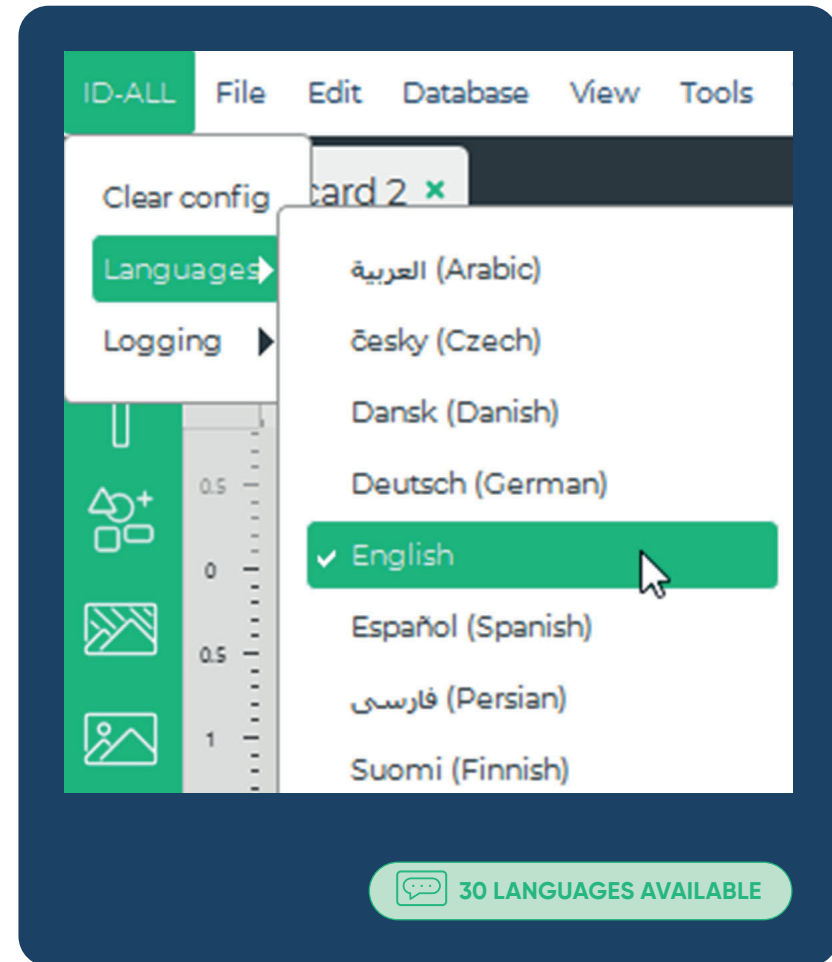

Security

- Signature acquisition
- Fingerprint acquisition
- User and rights management

Installation & configuration

- Printer connection via USB or Ethernet
- Compatible with macOS and Windows
- Available in 30 languages
- Help and support

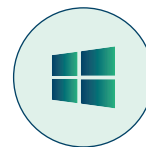

Designed for **ALL USERS**

The many features of ID-ALL are complemented by its ease of use and ergonomics. The entire interface has been designed to offer users comfort and speed of execution. It uses the typical design software tools and will seem very familiar to you quickly.

Integrated help and support

COVERS ALL NEEDS

with 4 editions

ID-ALL offers numerous features to help you design your cards. To help you choose the one that best suits your needs, we have defined a range of 4 editions.

STARTER

This first edition meets simple graphic personalization needs. It is suitable for small organizations taking their first steps with card personalization software. They will be able to easily create their cards, thanks to basic design and printing features.

STANDARD

The Standard edition offers greater graphic personalization possibilities and meets simple database management needs. First-level encoding functions are also available, such as adding QR codes or magnetic stripe encoding. This edition is aimed at small-sized organizations that occasionally print cards.

ADVANCED

The 3rd edition of ID-ALL marks a turning point in the offer by providing first-level security features and integrating new possibilities in database management. In this Advanced edition, the graphic design tools are optimized to make you more efficient, ideal for applications related to the registration of people. All these features are very useful for organizations that print cards regularly.

EXPERT

The Expert edition covers all card personalization needs, in terms of design, database, encoding or security. It is suitable for organizations with the most demanding card issuance requirements. In addition, new features can be integrated through the addition of plugins.

The 4 editions of ID-ALL have their own features, but they all have one thing in common: they are easy to use. The ID-ALL software, regardless of the edition used, can be easily installed on your PC or Mac and connects just as intuitively to your card printer, via USB or Ethernet. To suit EVERYONE, the ID-ALL interface is available in 30 languages and offers a help and support section to assist you whenever you need it.
