

COUNT PACKAGES

COUNT PACKAGES by LABELMATE USA provide a complete off-line counting solution that allows you to rewind and count your label rolls. With a COUNT PACKAGE from LABELMATE USA, you have full tension control over the tightness of your rolls. And after winding one direction, you can rewind the roll back into its original orientation by simply flipping a switch. Through use of the Preset Count Feature, you can also stop the system when a preset count is reached.
