

LE1017-J

FEATURES

- + Reliable performance
- + Sturdy design and easy operation
- + 17in projected capacitive touch panel
- + Automatic brightness control
- + Positive locking tilt angles
- + High contrast with 500:1 ratio
- + Built-in universal power supply
- + USB interface
- + VESA mount

Touch Screen Monitor

The LE1017-J 17 inch touch monitor is built to meet the requirements that leading retailers and restaurant operators need from their Point of Sale system. With the Projected capacitive touch panel, a high 500:1 contrast ratio and up to SXGA 1280X1024 resolution, the screen offers clear visibility for easy and efficient operations. The touch screen is highly rugged and stable, built for continuous use. The unit includes a solid base and a locking tilt mechanism so that the angle of the touch screen does not change during usage. Furthermore, the LE1017-J offers multimedia functions thanks to its incorporated speakers, allowing for the playback of training videos and other valuable operations.

LE1017-J specifications
