MEMOR™ X3

⊕DATALOGIC

RUGGED ERGONOMICS

Small, slim and light, the Memor™ X3 mobile computer provides excellent ergonomics for single-handed use, and its rugged, sealed construction survives unintentional drops and exposure to water and dust. Laser models feature a Corning® Gorilla® Glass 2 scan window guaranteeing optimum scanning performance.

CAPTURE

For the capture of 1D/Linear codes, there is a choice of laser or linear imaging technologies. The laser model offers high-speed reading and a greater depth of field, while the linear imager offers high responsiveness in reading poorly printed or damaged codes. Additionally, an area imager option is available for the reading of 2D, linear and stacked codes.

COMPUTE

The Memor X3 mobile computer offers industry standard operating systems, a faster microprocessor, and more RAM memory for applications. A large amount of Flash memory enables the backup of data and the management of large databases, while a user-accessible SD card slot supports up to 32 GB, allowing further extension of its storage capacity.

COMMUNICATE

Models are available in Batch or Wi-Fi, allowing you to transfer data through wired standards (USB, RS-232 or Ethernet, via a cradle) or through a fully Cisco-compatible 802.11 a/b/g/n radio, supporting security protocols such as WPA and WPA2.

READY TO USE

Equipped with a power supply, a micro-USB cable and a full set of software tools (including Wavelink Avalanche™) the Memor mobile computer is ready to use, right out of the box!
