

# TOM-M7 : 17" Touch Monitor

*rugged, compact, priced right*

TOM-M7 is more than a touchmonitor. Designed specifically for touch applications, TOM-M7 sits on a sturdy base and is sealed against spills. It allows additional devices to be integrated neatly, without extra cables or power supplies. Add-on devices are magnetic card reader, barcode slot reader, fingerprint reader, and rear customer display.

TOM-M7 offers different touch technologies to fit into your application and budget requirements. Choose Resistive, Intellitouch, or Infra Red. With its built-in 4 USB ports, you can now easily connect keyboard, barcode scanner, and printer to TOM-M7, instead of reaching under or behind the counter for the PC ports.

Ideal for point-of-sales, kiosks, industrial control, gaming, healthcare. With its multiple benefits and competitive prices, TOM-M7 gives you more value than other touchmonitors.

## Specifications
