

ZEBRA

RFD40 PREMIUM PLUS SLED ADAPTER PLATE

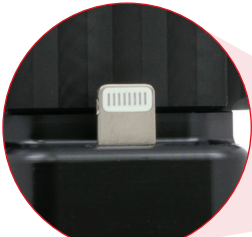

- ▶ Adapter Plate attaches directly onto the RFD40 Premium Plus Sled – Wired connection (eConnex)
- ▶ Securely holds your iPhone or Android phone in place on the RFD40 Premium Plus Sled
- ▶ Integrates with Zebra single and multi-slot desktop cradles for efficient docking and charging
- ▶ Designed to work with Zebra 123RFID mobile app

The ProClip Apple Lightning and USB-C Adapter Plates for the Zebra RFD40 Premium Plus UHF RFID Sled allow customers who use iPhones and Android phones in their workforce to use their phones with a wired connection (eConnex™) between the phone and the RFD40 Premium Plus Sled instead of Bluetooth. The solution requires Zebra's RFID123 mobile app to interface with point of sale, inventory and fulfillment software that runs on the phone. To attach the phone to the Adapter Plate the phone needs to be used in conjunction with the OtterBox uniVERSE case.

Secures Device with OtterBox uniVERSE Case
*Case sold separately.

Lightning or USB-C Connector

Wired Connection (eConnex™)
