

Your entire fleet. One single view.

Zebra Nucleus Unified Endpoint Management Platform

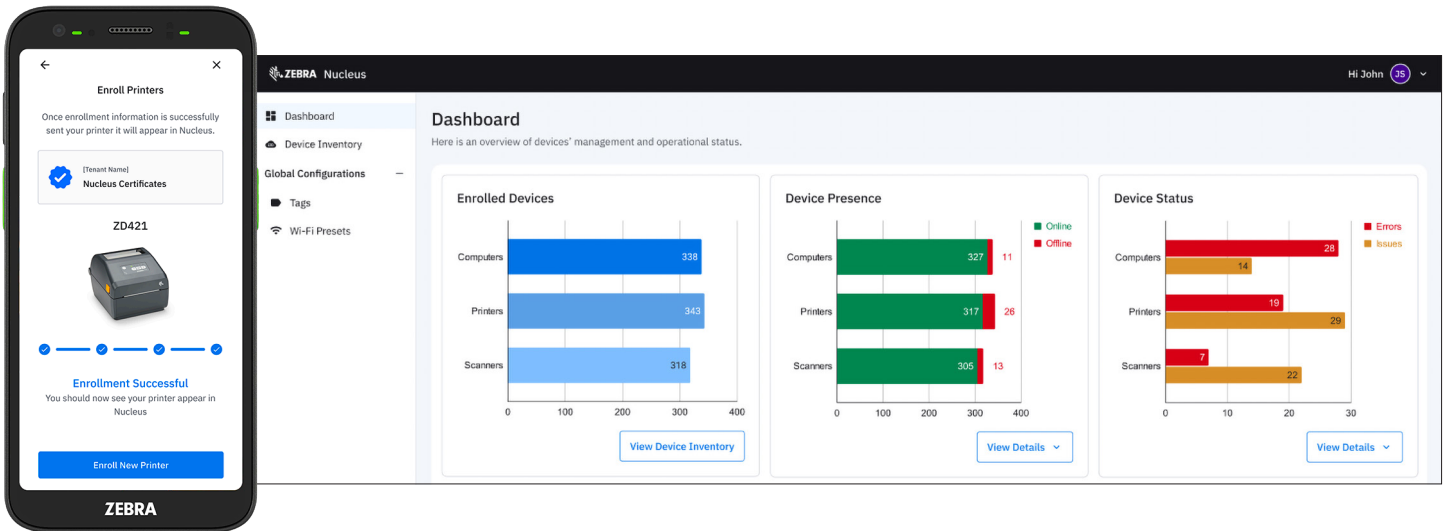

Zebra Nucleus is the single platform to unify and optimize your entire fleet of Zebra devices—from scanners and printers to your Android-based mobile computers.

Say goodbye to juggling multiple portals with siloed applications. Now, you can orchestrate your entire Zebra ecosystem from one integrated, intelligent, cloud-based platform.

Nucleus provides real-time visibility into device deployment, health, and performance, allowing administrators not only to stage, manage, and secure your devices, but also to unlock Zebra's powerful software-driven advantages across your entire operation.

Zebra Nucleus optimizes your fleet and your workflows, making your business operations simpler, faster, and more efficient than ever before.

Coordinate critical workflows across your extended Zebra device ecosystem from a single, all-in-one cloud interface.

Key features and benefits

Complete visibility and control

Achieve full oversight of your Zebra ecosystem on a single platform with seamless user experiences, regardless of device type.

Combined inventory

Administer large fleets of enrolled Zebra devices in one consolidated view, simplifying management and oversight.

Simplified onboarding

Add, configure, and update devices safely with automated provisioning.

Flexible integration

Use as a complete standalone solution or seamlessly alongside existing enterprise management tools.

Enhanced security

Keep your devices and business protected with instant notifications and updates to the latest software patches and security firmware.

Centralized license management

Manage licenses for all your Zebra devices, all in one place.

Standardized settings

Simplify setup and device configurations with common settings, such as Wi-Fi and tagging.

Freemium licensing model

Get essential functionality at no cost, plus additional advanced features such as remote “no touch” configuration, updates, and device controls through one paid license.

Target users and applications

IT administrators

- Over-the-air device staging
- Software and security updates

Operations managers

- Standardized settings
- Remote configuration
- Device health and performance

Frontline workers

- Consistent, intuitive user interface
- Easy access to on-device apps and tools
- Pre-configured user profiles

One integrated portal for all your Zebra devices
