

UltraSoft Wristband for extended stay comfort

This wristband is designed for **durability** during **prolonged** wear, making it an excellent choice for healthcare facilities, especially where frequent re-banding is necessary, such as extended stay care facilities and clinics. This ensures consistent patient identification, enhancing **safety** and **accuracy** in patient care.

Only
32%
of ICU (Intensive Care Unit) patients, who often have extended hospital stays, had **legible** and **accurate** data on their wristbands*
